Southeast Aerospace

Presents the Superior Solution for ELT Testing!

WS Technologies Inc.

BT200 Handheld Beacon Tester

The BT200 Beacon Tester sets the standard for emergency beacon testing. Building on the proven BT100 platform, the BT200 delivers enhanced decoding and measurement capabilities for all known First- and Second-Generation Cospas-Sarsat beacons, AIS-EPIRBs, and AIS Class A & B transceivers. Ensure complete, accurate testing with a rugged, industry-leading solution designed for today's beacon technologies.

FEATURES:

- Measures all 406, 121.5, 243 MHz, and AIS-EPIRB parameters, including complete channel measurements
- Integrated IP67-rated waterproof receiver with internal antenna for over-the-air testing
- Built-in oscillograph for real-time signal monitoring and analysis
- Internal temperature sensor and ±0.25 dB direct-connect accuracy at 406 MHz ensure precise measurements
- Direct beacon-to-tester coax connection eliminates need for an external attenuator
- Intuitive Android-based software with support for text, audio, photo, and video measurement records
- Generates custom PDF Beacon and IMO test reports and exports data for PC storage or analysis
- Supports testing of 121 and 121/243-only beacons (C91a ELTs)
- Exceeds IMO, FAA, IC, and EuroCAE EPIRB, ELT, and AIS inspection requirements
- Automatically identifies beacon manufacturer and model from the Cospas-Sarsat approval database
- Free software and firmware updates
